

**Any reseller engineer can
quote any vendor, in minutes,
validated by the vendor's own tool**

Two vendor lines live. A Nordic distributor piloting. Raising **12 MSEK** seed to reach break-even.

PROBLEM

A reseller loses the deal because the one person who could quote it is not available

A customer asks for 180 TB of storage across two sites and a server for their ERP.

The reseller has one engineer who can configure that. He is deep in one vendor, and he is booked for the week.

The seller says "we will come back to you". The customer's second call goes to a competitor.

Nobody writes it down. This happens every week, at every reseller.

hours

of a senior engineer's time per configuration, 140 part numbers the vendor's system must accept

1 of 2–4

vendor lines each engineer knows. Deals on the others are turned away

90–130k

SEK a month for that engineer. Nobody hires a second one for a few deals a year

"AI assist means one engineer covers roughly five vendors."

Marius Midtskogen, solution specialist, Pedab Norway. Said before we had shown him the product

SOLUTION

You describe the deal. Oyster builds and validates the configuration.

1 · You describe

"180 TB replicated across two sites, plus an ERP server"

A sentence, or the customer's tender document

2 · Oyster builds

Asks the questions a specialist would, then drafts the full bill of materials

Every line checked against the vendor's own catalog and rules

3 · You send

Vendor-native order file, branded quote, architecture diagram

Uploads into the vendor's configurator and passes

minutes

Instead of hours of senior engineer time

5×

Vendors one engineer can quote

PRODUCT READINESS

IBM took 14 months to capture. HPE took two weeks.

IBM Power and FlashSystem, co-built with a Pedab sales engineer

14 months

LIVE

HPE ProLiant, Alletra, MSA, SimpliVity

2 weeks

LIVE

Next lines: Huawei, xFusion, Dell, Lenovo

weeks each

FUNDED BY CUSTOMERS

110k

HPE option codes captured across 121 models

byte-exact

Oyster's IBM export matches IBM's own file

0

Outside capital used to build it

WHY NOW

Three things changed in 2026

CHANNEL

IBM and HPE cut to two distributors each

Resellers lose the distributor presales desk they leaned on.

TECHNOLOGY

Capturing a vendor catalog went from years to weeks

Frontier models read the configurator; deterministic rules do the checking.

CATEGORY

US resellers already pay for a bespoke version

Quote cycle from 1 to 2 days to 15 minutes at one reseller, 49k USD in year one.

MARKET

Quoting software is a 7 billion USD category.
We enter through the reseller engineer's seat.

7.3 bn USD

CPQ software by 2030, from 3.2 today, 16 percent a year. None of it validates hardware physics

4,500

Reseller engineer seats in the Nordics. 350 MSEK ARR at list

13,000

Seats is 100 MUSD. Vendor tools are identical worldwide, so captured lines travel

First distributor's book alone: 450 resellers, 1,125 seats, **88 MSEK** ARR at list.

BUSINESS MODEL

Capture a vendor once, sell it to every reseller carrying that line

6,500 SEK / seat / mo

5 to 7 percent of the engineer it multiplies

86 %

Gross margin with inference as cost of goods

300k SEK

Per vendor line, paid by the customer who wants it

CHANNEL

Distributors source and bill, keep 25 to 35 percent. Non-exclusive. Seats attach to the reseller, so they survive any franchise change.

MARGINAL COST

The sixth reseller on a captured line costs us about 48,000 SEK a year in inference. The bespoke alternative costs the reseller 49,000 USD.

TRACTION

A distributor with 450 resellers is piloting, and its CEO is now in the conversation

1.9_{bn SEK}

Pedab, Nordic distributor, nine countries, family-owned

since June

Marius Midtskogen co-built the IBM line with us on real deals; IBM business-unit head sponsors

2.6_{MSEK}

Three-year framework ready to table: two catalog captures plus seat minimums

3 September: CEO received IBM's configurator validating Oyster output. Follow-up meeting proposed for mid-September.

TEAM

Ten years selling this hardware, ten years shipping products, fifteen years building systems

FOUNDER · BUSINESS, ARCHITECTURE

Axel Sundelöf

Ten years in data centre sales and solution architecture at **HPE, NetApp and Object First**. Watched resellers lose deals they should have won. Runs customers and distribution.

FOUNDER · PRODUCT

Christoffer Jensen

Most recently CPO at a gaming company; before that eight years of product for **Scania, H&M, Försäkringskassan, MediCarrier and Carium**.

FOUNDER · ENGINEERING

Isak Burström

Fifteen years full-stack, runs his own development agency, AI integration and system architecture. Owns the rules engine and the validation.

All three still write code. Delivered for Ericsson, SVT Play, Scania and H&M. **We have not scaled a company or run a board, which is what we want from a lead.**

THE ASK

12 MSEK takes Oyster to break-even. The base case is worth 170 to 270 MSEK at exit.

EXIT ARR, MSEK

Y3 Q2

Cash-flow break-even at about 310 seats. No second round needed in the base case

USE OF FUNDS, 24 MONTHS

Vertical SaaS changed hands at 7 to 8.5 times revenue in 2025. At 5 to 8 times, year-three base ARR is **170 to 270 MSEK**; the ambitious case is 300 to 480.
